

UDF-ALK Series

Alkaline Filters

- ✓ 12,000 gallon capacity*
- ✓ Increases alkalinity and negative ORP (Oxidation Reduction Potential)
- ✓ Adds beneficial minerals back into water
- ✓ 4.5" x 20" Perfect for water stores, water stations and bottlers

HYDRONIX UDF-ALK SERIES FILTERS

produce perfectly pH balanced alkaline water, helping to minimize fluctuations in your normal pH. Hydronix UDF-ALK Series filters increase the antioxidant level (negative ORP) in your water to neutralize free radicals and DNA damage. Unlike regular water which has a positive ORP which could create damaging free radicals in your body, Hydronix UDF-ALK Series filters increase negative ORP levels to provide you with water that acts as an antioxidant.

HYDRONIX UDF-ALK SERIES FILTERS

increase the pH of drinking water from the tap to a range of about 8.5 to 10 (alkaline). There are many health benefits attributed to raising the pH level in the body and obtain a more alkaline state that optimizes the body's health. Hydronix UDF-ALK add beneficial Calcium and Magnesium to the water while also increasing the water's ORP (antioxidant level).

HYDRONIX UDF-ALK SERIES FILTERS

help change acidic RO water into a perfect natural alkali calcium ionized water by adding back into the water essential and beneficial elements such as ionized calcium, magnesium, sodium and potassium.
