

UVA-24B – UVA-200B
Commercial Ultraviolet Systems

POLARIS SCIENTIFIC UV™
Water Treatment Systems Features

- Specially designed, patented lamps provide consistent and reliable ultraviolet output over the entire life of the lamp (9000 hours) to ensure continuous purification.
- Durable stainless steel chamber to prolong life and eliminate ultraviolet light degradation.
- Counter display visually displays days of use and will alarm if lamp failure occurs. LED lamp out indicator.
- Simple to maintain and service allowing for easy lamp replacement.
- UV system controller features a sealed case to prevent damage from accidental water intrusion and is CSA and CE compliant.

Polaris Scientific Ultraviolet systems provide a sleek, compact design and economical ultraviolet water treatment for low flow and medium flow applications such as: light commercial reverse osmosis systems, water vending machines, food industry, laboratory, medical facility water, pharmaceutical, cosmetic processes, final electronic component rinsing and recirculation loops to name a few.

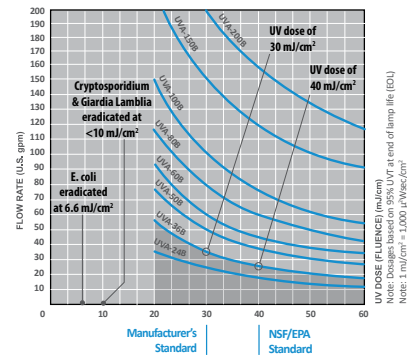

Polaris Scientific Ultraviolet systems produce little change in water temperature even after prolonged periods of no water flow, making them ideal for many application requirements.

Polaris Scientific Ultraviolet systems efficient easy installation design connector cup allows for a fast secure connection from the ballast to the lamp. No special tools are needed for the installation and it makes maintenance fast and easy. Both Lamp and Ballast will provide all the benefits of the new Patented design.
